Víctor Alarcón Serrano

Developer with more than *4 years* of experience ranging from PHP back-ends to the latest JS technologies. Currently expanding his knowledge in the *front end* spectre of the Web to create more performant, reliable and accessible pages. Past experiences involved maintaining, improve and fully develop websites, working closely with small *multidisciplinary* teams to bring success to our clients. Focused on detail with a keen eye on aesthetics yet always trying to find the best ways to structure and architect projects.

Front-end Web Developer
Available to work *remotely*, willing to *relocate* aboard and/or around *Barcelona* area.

Expercience

PutosModernos
Front-end Developer 2017 - 2021

Finding the right tools and technologies for each project -usually with the collaboration of the client- and focusing on developing the Front-end side of them. Using technologies ranging from WordPress and Prestashop to JAM stack (Nuxt and headless CMS) solutions.

Girona City Council
Fullstack Web Developer 2016 - 2017

Design, develop and manage projects for a department of the City Council (UMAT). Projects focused on the divulgation and access of data collected by the department. Developed mainly with PHP, Bootstrap, SCSS and jQuery.

Ciclick
Junior Web Developer 2014 - 2015

Develop web pages from designs accepted by the client, maintenance and improvement of pages already created. Deployment of WordPress and Prestashop (among others) and modification of templates.
